

B975 User Guide

CHAPTER 8 Guide Bushing Adapter Selection

FOR HAND HELD ROUTERS ONLY

The B975 requires a router fitted with the e10 guide bushing, and possibly an adapter to fit the bushing to the router. Leigh offers the following guide bushing adapters that fit many common routers.

See the list of routers in the chart on the next page. **For a complete list of routers see www.leighjigs.com.**

DIRECTIONS

- A.** Locate router maker and router model in Columns 1 and 2.
B. Locate adapter required for your router in Column 3.
- Order Leigh adapters (part no's in red) in Column 3 from Leigh.
 - Order Bosch adapters RA1100 and RA1126 in Column 3 from Leigh or your Bosch dealer.
 - Order all other adapters from the router manufacturer's dealer.

Note: Adapter mounting screws are included with router.

C. Note: ♦ The e10 elliptical guide bushing (5/8" [15.8mm]) shown in column 4 is supplied with the B975 jig. Order only if you require a replacement.

Adapters for Router Tables

Leigh guide bushings and eBushes are based on the industry standard 1-3/8" 2-piece design. Most router tables have adapters that accept these standard guide bushings. If your router table does not have a suitable adapter, please check with the router table manufacturer.

1 BRAND	2 ROUTER MODEL	3 ROUTER ADAPTER	4 e10 ♦
BLACK & DECKER	All Professional, HD1250, RP400K, 7614	Not Required	e10
